

Routine health checks for babies and children

In Australia, it's recommended babies and children have regular health checks with a child health nurse or doctor from birth to 5 years.

Babies (up to 12 months)

- ☐ At birth
- ☐ 1 to 4 weeks
- ☐ 6 to 8 weeks
- ☐ 4 months
- ☐ 6 months
- ☐ 12 months

Children (1 to 5 years)

- ☐ 1 year
- ☐ 18 months
- ☐ 2 years
- ☐ 3 years
- ☐ 4 years

Take your child to see a GP in between their regular health checks if they are sick or you are worried about their health.

Your GP can also provide vaccinations for your child when they are due.

Some community child health centres also run vaccination clinics.
